

# Reviewers Help

## The Principles

Dear reviewer

We are greatly thankful that you kindly spend your time on reviewing the articles of the journal.

**The following points are very important for journal policies:**

1. Practical/application aspects of the article subject. All articles must have an “Application Remarks” or state the application of results in conclusion section.
2. Innovation in subject of article. If the subject is repeated, than what’s its innovatory aspect? Or what’s its necessity?
3. The references must be researchable on the Internet:
  - a) If a reference is in native language of the author(s), the English abstract of the article must be researchable on the internet and the author(s) must state “e.g. [article in Farsi (or other native languages)]” at the end of references.
  - b) Reference type of "book, theses/dissertation, and conference articles" is not acceptable.
4. Review form has a “download file” section at the end. Please add comments for all sections of an article and upload it in “download file” section.
5. Tables and graphs must be exactly the same as examples described in “Submission structure” at the journal website.
